India (Open to Relocation) | Immediate Joiner

PROFESSIONAL SUMMARY

Frontend Developer with 4.8+ years of overall frontend development experience, professional experience with both React.js and Angular/AngularJS, including React.js work on the Practice Administration and ITS Tracker projects. Strong in JavaScript (ES6+), TypeScript, reusable components, responsive design, REST API integration, and maintainable UI architecture. Professional Angular work includes RxJS, Reactive Forms, and Angular Material on healthcare Electronic Health Record (EHR) applications. Collaborates effectively with backend, QA, and product teams. Open to React.js Developer and Angular Developer roles; available to join immediately.

TECHNICAL SKILLS

Frontend Frameworks: React.js, Angular, AngularJS

Programming Languages: JavaScript (ES6+), TypeScript

React Development: Functional Components, JSX, Props, State, React Hooks

Angular Development: Components, Services, Dependency Injection, Routing, RxJS, Reactive Forms, Form Validation, Angular Material, HTTP Interceptors, Route Guards

UI Development: HTML5, CSS3, SCSS, Bootstrap, Responsive Design

API Integration: REST APIs, JSON, Swagger/OpenAPI, JWT-based Authentication Integration

Testing: Jasmine, Karma

Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Jira, Azure DevOps, Azure

PROFESSIONAL EXPERIENCE

KJ Systems India Pvt Ltd (Adaptamed LLC) — **Vijayawada, Andhra Pradesh, India**

Client/Product: EHR YOUR WAY – Electronic Health Record Platform

Software Developer (Frontend) — **February 2023 – Present**

- Develop and maintain React.js, Angular, and AngularJS single-page applications for an EHR platform using JavaScript and TypeScript.
- Build reusable React.js functional components using JSX, props, state, and React Hooks, alongside Angular components.
- Build reusable, responsive UI components using React.js, Angular Material, SCSS, and Bootstrap.
- Integrate REST APIs for patient information, prescriptions, appointments, and insurance and billing workflows.
- Implement Reactive Forms with validation to support accurate, data-driven clinical and administrative workflows.
- Use RxJS to manage asynchronous data streams and API responses in the UI.
- Implement role-based UI access in the application interface.
- Collaborate with API, QA, and product teams to troubleshoot defects and deliver features.

UI Developer — **December 2021 – December 2022**

- Developed reusable React.js and Angular components and maintained AngularJS modules.
- Built responsive UI screens using React.js, Angular, JavaScript, TypeScript, SCSS, Bootstrap, and Angular Material.
- Integrated REST APIs and created validated forms for application workflows.
- Supported feature development, bug fixing, and application testing.

INTERNSHIP

Orotron – Web Developer Intern — **July 2021 – December 2021**

Hyderabad, Telangana

- Developed responsive UI pages using HTML5, CSS3, Bootstrap, JavaScript, and Vue.js.
- Created reusable UI components and supported frontend feature development.
- Assisted with bug fixing, testing, and code reviews.

PROJECTS

Practice Administration

Role: Frontend Developer | Technologies: React.js, JavaScript, HTML5, CSS3, REST APIs

- Created reusable React components and responsive user interfaces for a practice administration application.
- Developed data-driven administrative screens, managing component state and integrating APIs.
- Applied component-based development to improve maintainability.

ITS Tracker

Role: Frontend Developer | Technologies: React.js, JavaScript, HTML5, CSS3, REST APIs

- Built reusable React UI components and tracker-related screens.
- Integrated APIs and handled application state for data-driven workflows.
- Delivered a responsive, maintainable user interface.

EHR Project

Role: Frontend Developer | Technologies: Angular, AngularJS, TypeScript, RxJS, Angular Material, SCSS, Reactive Forms

- Built reusable Angular components and responsive data-entry screens for Electronic Health Record workflows.
- Developed validated Reactive Forms and integrated REST APIs, using RxJS to manage asynchronous UI data.
- Maintained modular, maintainable frontend code across Angular and AngularJS modules.

EHR Portal

Role: Frontend Developer | Technologies: Angular, TypeScript, Angular Material, SCSS, REST APIs

- Developed portal UI components and application screens using Angular and Angular Material.
- Built reusable layouts and data-driven forms, integrating REST APIs with loading, validation, and error states.
- Maintained a consistent user experience across portal workflows.

EDUCATION

Bachelor of Science (B.Sc. – MPC)

Parvathaneni Brahmayya Siddhartha College of Arts & Science, Vijayawada | Krishna University 2015 – 2020

LANGUAGES

English – Professional | Telugu – Native | Hindi – Conversational | Urdu – Conversational
